Interference Practice: Consideration of Fraud and Inequitable Conduct

The Commissioner's Notice of Oct. 24, 1991, *Consideration of Fraud and Inequitable Conduct in Patent Interference Cases*, provides that:

> Effective immediately, fraud and inequitable conduct issues will be considered when properly raised *inter partes* in patent interference cases.

* * * * *

The Chairman, the Vice Chairman, an Examiner-in-Chief or a panel of the Board of Patent Appeals and Interferences, as may be appropriate, are authorized to determine the manner in which fraud and inequitable conduct can be raised in any interference pending before the Board at this time.

The present notice sets forth the policy which will be applied by the Board of Patent Appeals and Interferences (Board) in determining whether the issues of fraud and inequitable conduct raised in a pending interference proceeding will be given consideration.

1. Issues of fraud and inequitable conduct which were raised in an interference for the first time before the date of the Commissioner's Notice (Oct. 24, 1991) will not be considered by the Board.

2. Issues of fraud and inequitable conduct raised in an interference for the first time after the date of the Commissioner's Notice will be considered by the Board if:

(a) They are raised by way of a motion for judgment under 37 CFR 1.633(a) which was filed before the expiration of the period set for filing preliminary motions, or

(b) They are raised subsequent to the period set for filing preliminary motions, and the party raising them shows good cause under 37 CFR 1.655(b)(3) as to why they were not timely raised during the preliminary motion period. An assertion that the issues were not raised earlier because the Board was precluded from considering them by the Commissioner's Notice of October 17, 1988 (1096 Off. Gaz. PTO 19, Nov. 8, 1988) shall not be deemed good cause. Examples of good cause would be (i) where the fraud or inequitable conduct was not discovered until after the close of the period for filing preliminary motions, or (ii) where the period for filing preliminary motions expired after the Oct. 24, 1991, date of the Commissioner's Notice but before publication of the notice in the *Official Gazette*, and the preliminary motion for judgment raising the issue of fraud and inequitable conduct was filed promptly after the notice was published.

Counsel who are contemplating raising issues of fraud and inequitable conduct should direct their attention to the Commissioner's Notice of Dec. 23, 1986, *Interference Practice: Fraud and Inequitable Conduct Allegations* (1074 Off. Gaz. Pat. Office, Jan. 27, 1987).

Change of Correspondence Address

The Patent and Trademark Office's responsibility is to assure office correspondence reaches the correspondent's address of record. Recent studies conducted of mail returned to the PTO from the United States Postal Service (USPS) as undeliverable indicates that the majority of this mail is not delivered due to the expiration of a forwarding order placed with the UPPS.

Whenever the correspondence address for a patent, patent application, registered trademark or trademark application changes, the applicant or his/her representative needs to submit a change of address (See Section 601.03 of the Manual of Patent Examining Procedures and Section 603 of the Trademark Manual of Examining Procedures). The mere inclusion of a new correspondence address in a paper being filed for another purpose would not ordinarily be recognized or deemed as instructions to change the address on the file record.

Although a change of correspondence address notification need take no particular form, a separate notification must be filed for each application. At a minimum, the following information should be provided:

- •Identify the documents as a "Change of Address"
- •Prepare the new correspondence address
- •For a patent: State the patent number and serial number
- •For a registered trademark: Provide the registrant's name and the number and date of the certificate.
- •For a trademark application: Provide the name of the applicant, the serial number and filing date of the application, along with the Trademark law office in which the case is pending. See Trademark Rule 1.5.
- •For a national patent application: Identify the application number (consisting of the series code and the serial number (e.g., 07/123,456)); or the serial number and filing date assigned to that application by the PTO. In addition, provide the group art unit where the application is pending or other unit prosecuting the application (e.g., the Board of Patent Appeals and Interferences).
- •For an international application: Identify the international application number (e.g., PCT/US91/11111)

For patents and patent applications, as required by 37 CFR 1.33(a), a change of correspondence address notification must be signed by an attorney or agent of record or by the applicant unless the assignee of record has intervened as provided by 37 CFR 1.32. In those instances where a change of address of a registered attorney or agent is necessary, provisions exist for changing a large number of applications and are contained in Section 601.03 of the Manual of Patent Examining Procedure.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Agency: Patent and Trademark Office, Commerce.

Action: Request for information from domestic industries regarding possible adverse effects of the process patent amendments made by the Omnibus Trade and Competitiveness Act of 1988 (Pub. L. 100-418).

Date: Comments must be received on or before January 31, 1992.

For Further Information Contact: Documents and questions should be submitted to Michael K. Kirk, Assistant Commissioner for External Affairs, Box 4, Patent and Trademark Office, Washington, DC 20231. Telephone at (703) 305-9300.

Supplementary Information: The Omnibus Trade Competitiveness Act of 1988 (Pub. L. 100-418) was enacted on Aug. 23, 1988. Among other things, the Act amended title 35, United States Code, to extend the protection of a process patented in the United States also to products made by that process. As a consequence, whoever without authority imports into the United States, or sells or uses in this country, a product made by a patented process shall be liable as an infringer, if the importation, sale or use occurs during the term of the process patent. (Sections 9002 and 9003 of Pub. L. 100-418). The effective date of that amendment was Feb. 23, 1989.

Section 9007 of the Act requires the Secretary of Commerce to report to the Congress, at the end of each one-year period from the effective date of the above amendments, on the effect of these amendments on those domestic industries that submitted com-

plaints during such period, alleging that their legitimate sources of supply have been adversely affected. Such reports must be submitted for five successive years.

The third report from the Secretary of Commerce to the Congress will be submitted on Feb. 23, 1992, covering the preceding one-year period. Accordingly, it is requested that domestic industries wishing their complaints reflected in the Secretary's report ensure that any submission on this subject is received by the Department of Commerce not later than Jan. 31, 1992.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification*, *Index to the U.S. Patent Classification*, *Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Consideration of Fraud and Inequitable Conduct in Patent Interferences Cases

This notice supercedes the Commissioner's Notice of Oct. 17, 1988, *Further Clarification on Patent and Trademark Office Implementation of 37 CFR 1.56*, 1096 Off. Gaz. Pat. Office 19 (Nov. 8, 1988), but not the Commissioner's Notice of Sept. 8, 1988, *Patent and Trademark Office Implementation of 37 CFR 1.56*, 1095 Off. Gaz. Pat. Office 16 (Oct. 11, 1988).

Effective immediately, fraud and inequitable conduct issues will be considered when properly raised *inter partes* in patent interference cases. The policy of the Patent and Trademark Office with respect to investigation and resolution of fraud and inequitable conduct issues during *ex parte* examination of patent applications remains that of the Commissioner's Notice of Sept. 8, 1988.

The Chairman, the Vice-Chairman, an Examiner-in-Chief or a panel of the Board of Patent Appeals and Interferences, as may be appropriate, are authorized to determine the manner in which fraud and inequitable conduct can be raised in any interference pending before the Board at this time.

Interference Practice: Consideration of Fraud and Inequitable Conduct

The Commissioner's Notice of Oct. 24, 1991, *Consideration of Fraud and Inequitable Conduct in Patent Interference Cases*, provides that;

Effective immediately, fraud and inequitable conduct issues will be considered when properly raised *inter partes* in patent interference cases.

The Chairman, the Vice Chairman, an Examiner-in-Chief or a panel of the Board of Patent Appeals and Interferences, as may be appropriate, are authorized to determine the manner in which fraud and inequitable conduct can be raised in any interference pending before the Board at this time.

VOL 1133 ISS 2 DE 10 1991 UMI

The present notice sets forth the policy which will be applied by the Board of Patent Appeals and Interferences (Board) in determining whether the issues of fraud and/or inequitable conduct raised in a pending interference proceeding will be given consideration.

Issues of fraud and/or inequitable conduct in an interference will be considered by the Board if:

1. They are raised by way of preliminary motion for judgement under 37 CFR 1.633(a). The motion must be filed during the period set for filing preliminary motions (37 CFR 1.636(a)), or good cause (37 CFR 1.655(b) (3)) must be shown as to why the issues of fraud and/or inequitable conduct were not timely raised during the preliminary motion period. An assertion that the issues were not raised earlier because the Board was precluded from considering them by the Commissioner's Notice of Oct. 17, 1988, (1906 Off. Gaz. Pat. Office 19 (Nov. 8, 1988)) shall not be deemed to be good cause.
2. They are raised by motion in a currently pending interference in which the time for filing preliminary motions expired prior to the publication date in the *Official Gazette* of the Commissioner's Notice dated Oct. 24, 1991, and *provided* (a) the motion is promptly filed after the *Official Gazette* publication date of the notice, and (b) the times for taking testimony or, if no testimony, the times for filing briefs for final hearing (37 CFR 1.656) have not been set.

Issues of fraud and/or inequitable conduct will not be considered in any interference in which the times for taking testimony or the times for filing briefs for final hearing have already been set, unless "good cause" is shown under 37 CFR 1.655(b) (3). See item 1 above. An example of good cause would be where fraud or inequitable conduct is first discovered during taking of testimony.

Interference parties are reminded that fraud and inequitable conduct must be established by clear, unequivocal and convincing evidence, and the party asserting misconduct carries a heavy burden of persuasion. *Driscoll v. Cebalo*, 731 F.2d 878, 221 USPQ 745 (Fed. Cir. 1984); *Norton v. Curtiss*, 433 F.2d 779, 167 USPQ 532 (CCPA 1970). Accordingly, unless evidence filed with a preliminary motion for judgement (37 CFR 1.639(a)) *prima facie* meets this standard of proof, the motion may be denied. If a party asserts that testimony is necessary to support or oppose the motion (37 CFR 1.639(c)), the requirements set forth in *Hanagan v. Kimura*, 16 USPQ2d 1791 (Comr. 1990), must be complied with; for example (16 USPQ2d at 1794):

> A proper request under § 1.639(c) must describe the nature of the testimony being sought. The description must be of sufficient detail so that the Examiner-in-Chief can determine whether or not there is a need for the requested testimony.
>
> * * * * *
>
> If a person is to be called as a fact witness, a declaration by that person stating the facts should be filed new.
>
> If the other party is to be called, or if evidence in the possession of the other party is necessary, an explanation of the evidence sought, what it will show, and why it is needed must be supplied.

Preliminary motions in the nature of "fishing expeditions," or based on broad assertions or argument of counsel, will not be permitted. Cf. *Price v. Folsom*, 208 USPQ 56 (Comr. 1980).

Counsel who are contemplating raising issues of fraud and inequitable conduct should also direct their attention to the Commissioner's Notice of Dec. 23, 1986, *Interference Practice: Fraud and Inequitable Conduct Allegations* (1074 Off. Gaz. Pat. Office 421 (Jan. 27, 1987)).

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
